

Site:	Various
Location:	Australia, Malaysia, Singapore, Africa, India, Middle East
Description:	Instrumentation Installation, Calibration, and Maintenance Services.
Equipment:	Flow, Temperature, Pressure, Density, Mass Flow, Gas Detectors, etc.

Instruments are at the front line of your Process Monitoring, Control, and Safety Systems and as such must be correctly installed, calibrated, and maintained at all times.

With specific experience in Mining, Oil and Gas, Power Generation, Water Treatment, Sewage Treatment, and Building Management, Elmec are able to provide the following services:

- Supply and Installation of a wide range of Instrumentation including those in Hazardous Areas.
- Traceable Calibration Services.
- Critical Function Testing.
- Development and Implementation of Calibration and Critical Function Testing Schedules to suit your needs.

Result: An optimised process with improved throughput, reliability, and repeatability.
